Tuesday, March 23, 2021

2-2:30pm ET | 1-1:30pm CT | 11-11:30am PT

Event Description:

This presentation will dive into barriers of Opioid Use Disorder (OUD) diagnosis and treatment in the hospital setting. We will cover various tools on screening for OUD while hospitalized, building a partnership within the community, and how referral to treatment and peer support can be a key tool in the success of patients with OUD.

Learning Objectives:

- Defining and understanding opioid use disorder (OUD)
- Understand different OUD screening tools and the benefits of opioid risk assessment screenings
- Review the basics of building a strong community partnership with behavioral health treatment programs to promote long term recovery
- Recognize the importance of aftercare and wraparound services to prevent readmissions

Hosted by Alliant Quality, the quality improvement group of Alliant Health Solutions (AHS), the Hospital Quality Improvement Contractor (HQIC) under contract with the Centers for Medicare & Medicaid Services (CMS), an agency of the U.S. Department of Health and Human Services.

About Hospital Quality Improvement Contractors (HQIC):

The HQIC is a four-year program dedicated to improving behavioral health outcomes with a focus on decreased opioid misuse, patient safety with emphasis on reduction of harm, and care transitions with a focus on high utilizers. HQIC supports rural, critical access hospitals and hospitals that are low performing and serving vulnerable populations.
